

SUMMARY

GTM & Sales Operations Leader with 20+ years of experience spanning enterprise solution sales, strategic account leadership, and SMB commercial operations. Led sales and revenue organizations across telecom, technology, and GovTech, while building the operating systems that drive forecast accuracy, seller productivity, pipeline health, and execution discipline. Proven ability to align Sales, Marketing, Finance, Product, and Customer Success around a unified revenue plan, translating strategy into scalable growth through GTM planning, capacity modeling, territory design, pipeline governance, and cross-channel execution.

- Outpaced telecom market growth by 2x, delivering 5% YoY revenue expansion on a \$200M SMB division.
- Scaled a B2B software startup from \$5.8M to \$57.8M in 4 years, positioning the firm for a strategic acquisition by EDS.
- Lifted forecast accuracy to 95% with 3.3x pipeline coverage and expanded market territory coverage from 62% to 89%.

COMPETENCIES

GTM Planning	Pipeline & Forecast	Sales Governance	Systems, Data & AI
• Annual Operating Plan • Territory & Quota Design • Sales Capacity Modeling • Segmentation & Coverage • Channel Orchestration	• Forecast Governance • Pipeline Inspection • MBR / QBR • Funnel Conversion Analytics • Variance-to-Plan Reviews	• Sales Performance Management • Deal Desk / Pricing • Compensation & Incentives • Win/Loss Analysis • Launch Readiness Governance	• CRM Architecture • Dashboard Architecture • Workflow Automation (RPA) • AI-Assisted Sales Ops • Sales Analytics & Reporting

EXPERIENCE

SMB Operations Director
Ooredoo

06/2020 – 04/2026
Qatar

Led GTM and sales operations for a \$200M multi-channel SMB division (150+ personnel across direct, digital, retail, and indirect channels). Outpaced the sector market growth benchmark by 2x, delivering 5% YoY revenue expansion in a highly saturated telecom market by optimizing channel orchestration and cross-functional revenue alignment.

GTM Strategy & Revenue Architecture

- Built annual sales-capacity and workforce planning models linking market segmentation, conversion rates, territory coverage, productivity assumptions, attainment, attrition, and ramp economics to quota allocation and hiring plans, expanding partner capacity from 5 to 12 agents per partner while enabling 105% plan attainment.
- Designed the commercial funnel architecture linking Marketing, SDR, and Field Sales motions through governed MQL-to-SQL handoffs, lead-routing rules, conversion analytics, and stage-level pipeline management, anchored by funnel dashboards tracking source performance, conversion rates, velocity, and deal aging for earlier risk identification.
- Engineered the cross-channel quota cascade, translating the board-approved AOP target into channel-level commitments across direct field, indirect partners, retail, telemarketing, and digital.
- Built the commercial coverage model by segmenting markets, mapping territory potential through GIS analytics, and aligning direct, partner, retail, telemarketing, and digital channels to serviceable demand, expanding confirmed market coverage from 62% to 89%.
- Restructured the SMB product portfolio into six needs-based solution areas validated by customer beta testing, creating the standard GTM taxonomy adopted across sales, marketing, and digital channels.

Pipeline Governance & Commercial Operations

- Ran the weekly revenue operating cadence covering pipeline inspection, funnel conversion, and manager coaching, anchored by channel-level run-rate forecasting and stage conversion analytics to drive forecast accuracy to 95% with 3.3x pipeline coverage.
- Institutionalized monthly and quarterly business reviews (MBRs / QBRs) across channel owners, Finance, Product, and Sales leadership, converting performance insights into corrective action plans.
- Stood up Deal Desk and pricing governance, including discount approval frameworks, non-standard term reviews, and margin guardrails that accelerated complex deals without eroding unit economics.
- Owned B2B partner commission governance covering quotas, accelerators, clawbacks, SPIFFs, claims validation, and cost-of-sales reporting tied to ARPA, NRR, and new-logo growth.
- Ran structured win/loss analysis programs feeding insights into product, pricing, territory coverage, and field enablement decisions.

Cross-Channel Orchestration & GTM Alignment

- Stood up cross-functional launch governance for SMB products, coordinating Product, Marketing, Legal, Finance, and Sales through readiness gates and post-launch audits.

- Orchestrated multi-channel GTM execution across direct, indirect, retail, telemarketing, and digital, synchronizing product readiness, incentives, content, and campaign execution under one operating model.
- Led the SOHO indirect channel partners program, equipping 5 partner firms and 100+ frontline agents with a mobile SFA-enabled connected tablet stack (CRM, CMS, CPQ), co-sell playbooks, and commercial bundles.
- Aligned Marketing, Sales, and CS around shared revenue goals with common MQL / SQL / opportunity definitions, unified handoff protocols, and joint accountability frameworks.

Sales Systems, BI & AI Automation

- Built executive and front-line dashboards in Power BI, Qlik, and SQL, consolidating CRM, order, and KPI data into a single source of truth covering pipeline coverage, forecast accuracy, ARPA, NRR, and CAC.
- Deployed RPA bots to validate partner commission claims against CRM activations and billing, eliminating overpayments and compressing claim-to-payout cycles from weeks to days.
- Deployed a RAG-based AI sales assistant grounded in CRM, regulatory tariff libraries, and product documentation, serving customers, reps, and partners 24/7 across pre-sales, ordering, and support queries.
- Enriched outbound telemarketing workflows with customer segments, billing data, and automated routing, lifting outbound sales conversions from 18% to 25%.

Assistant Director Solutions

09/2014 – 06/2020

Ooredoo

Qatar

- Led enterprise solution sales for a \$600M B2B business, directing sales engineers and solution architects across pursuit strategy, bid qualification, solution design, executive presentations, commercial negotiations, and contract execution for complex ICT, cloud, and managed-services opportunities.
- Drove bid-to-win ratio to 28% by combining MEDDPICC qualification methodology with deal-level Commit, Best Case, and Upside forecast tagging and rigorous SFA hygiene discipline, embedded into weekly deal-review coaching.
- Led pursuit and closure of a \$50M global secure network for 110 diplomatic missions, coordinating solution design, partner strategy, and commercial negotiations while improving margins by 3%.

Director S&LG Accounts

06/2009 – 09/2014

Electronic Data Systems (EDS)

Raleigh, NC

- Owned P&L, executive stakeholder relationships, contract management, and growth strategy for a portfolio of State & Local Government customers, securing 100% renewals and multiple contract expansions.
- Directed a three-year \$25M Electronic Medical Records modernization at the NC DHHS — supervised HIPAA-compliant COTS customization and rollout across 100 counties with FTEs, partners, and contractors.
- Recovered a \$12M Maryland Retirement Services modernization — negotiated baseline scope, deployed change management, and stood up an offshore development team to deliver against a legacy mainframe environment.

Systems Development Director

08/2002 – 06/2009

Saber Software (Acquired by EDS)

Portland, OR

- Capitalizing on the Help America Vote Act as a market-creation opportunity, built and scaled the company's Voter Registration and Elections Management practice, propelling annual revenue from \$5.8M to \$57.8M in four years across 13 states.
- Earned the 181st ranking on the 2007 Deloitte Technology Fast 500, and the practice's commercial momentum led to Saber's acquisition by EDS in 2008.
- Designed a six-track deployment blueprint and national sales model that transformed bespoke implementations into scalable rollouts with a 100% on-time, on-budget track record across all 13 states.
- Led due diligence and post-close integration of Covansys Corporation's \$40M S&LG practice acquisition, consolidating consulting practices, onboarding 300 employees and dozens of in-flight projects, and identifying operational cost reduction opportunities.
